### Questions to Consider

1. Noting the new charging arrangements represent an overall reduction in the department's collection of CRICOS charges from the international education sector, what are your views on the proposed implementation approach outlined in the CRIS?
2. Do you have any comments on the CRICOS Annual Registration Charge (CARC)?
  - a. CARC Part A – relates to sector wide regulatory activities, payable by all CRICOS providers
    - i. Base component plus a per enrolment component
  - b. CARC Part B – set amount payable by all CRICOS registered school providers
  - c. CARC Part C – set amount payable by CRICOS registered school providers with at least one enrolment in the previous calendar year.
3. Do you have any comments on the Schools Initial Registration and Schools Renewal Registration Charges?
4. Noting the requirement for cost recovery to be consistent with Government policy, do you have any comments on how the price for each charge has been determined based on the costing of application and non-application based activities?
5. Do you have any other comments?
