(a) The New Adjusted Attrition rate for year(x) is the proportion of students who commenced a course in year(x) who neither complete in year(x) or year(x + 1) nor return in year(x + 1). The new adjusted attrition rate calculation is similar to the normal attrition rate calculation, however it is based on a match process using both the StudentID and the Commonwealth Higher Education Student Support Number (CHESSN). This gives a more accurate attrition rate calculation, as it identifies students at either the same or a different higher education institution. In other words, if a student moves from one institution to another in the following year, he or she would be counted as retained in the new adjusted attrition rate calculation, but attrited in the normal attrition rate calculation. For the new adjusted attrition rate, it is only those students who left the higher education system entirely (that is, they were no longer at any institution) that are counted as attrited.

(b) Data for the Australian Defence Force Academy are included under The University of New South Wales.

(c) Previously University of Ballarat.

(d) Torrens University Australia became a Table B university in 2015.

(e) From 2007 onwards, data for the Australian Maritime College are reported as part of the University of Tasmania.

(f) As a result of a collaborative partnership between Batchelor Institute of Indigenous Tertiary Education and Charles Darwin University which established The Australian Centre for Indigenous Knowledge and Education (ACIKE), the delivery of most undergraduate programs is at Charles Darwin University from 2012.

Cell values of '.' indicate no domestic commencing bachelor students.

(a) The New Normal Attrition rate for year(x) is the proportion of students who commenced a course in year(x) who neither complete in year(x) or year(x + 1) nor return in year(x + 1). The new normal attrition rate calculation is based on a match process using the students' StudentID. This gives a "crude" attrition rate, which identifies students that neither complete a course nor are retained the following year at the same institution. Students who remained at the same institution, but changed course are not counted in the attrition group. Students who changed institution are counted as attrited.

(b) Data for the Australian Defence Force Academy are included under The University of New South Wales.

(c) Previously University of Ballarat.

(d) Torrens University Australia became a Table B university in 2015.

(e) From 2007 onwards, data for the Australian Maritime College are reported as part of the University of Tasmania.

(f) As a result of a collaborative partnership between Batchelor Institute of Indigenous Tertiary Education and Charles Darwin University which established The Australian Centre for Indigenous Knowledge and Education (ACIKE), the delivery of most undergraduate programs is at Charles Darwin University from 2012.

Cell values of '.' indicate no overseas commencing bachelor students.

(a) Success rate for year(x) is the proportion of actual student load (EFTSL) for units of study that are passed divided by all units of study attempted (passed + failed + withdrawn). Any units of study undertaken as Work Experience in Industry are excluded from the calculation.

(b) Data for the Australian Defence Force Academy are included under The University of New South Wales.

(c) Previously University of Ballarat.

(d) Torrens University Australia became a Table B university in 2015.

(e) From 2007 onwards, data for the Australian Maritime College are reported as part of the University of Tasmania.

(f) As a result of a collaborative partnership between Batchelor Institute of Indigenous Tertiary Education and Charles Darwin University which established The Australian Centre for Indigenous Knowledge and Education (ACIKE), the delivery of most undergraduate programs is at Charles Darwin University from 2012.

Cell values of '.' indicate no domestic commencing bachelor students.

(a) Success rate for year(x) is the proportion of actual student load (EFTSL) for units of study that are passed divided by all units of study attempted (passed + failed + withdrawn). Any units of study undertaken as Work Experience in Industry are excluded from the calculation.

(b) Data for the Australian Defence Force Academy are included under The University of New South Wales.

(c) Previously University of Ballarat.

(d) Torrens University Australia became a Table B university in 2015.

(e) From 2007 onwards, data for the Australian Maritime College are reported as part of the University of Tasmania.

(f) As a result of a collaborative partnership between Batchelor Institute of Indigenous Tertiary Education and Charles Darwin University which established The Australian Centre for Indigenous Knowledge and Education (ACIKE), the delivery of most undergraduate programs is at Charles Darwin University from 2012.

Cell values of '.' indicate no overseas commencing bachelor students.

(a) The New Adjusted Retention rate for year(x) is the number of students who commenced a bachelor course in year(x) and did not complete in year(x) or year(x+1) and continued in year(x+1) (retained students), as a proportion of all students who commenced a bachelor course in year(x) and did not complete in year(x) or year(x+1). The new adjusted retention rate calculation is similar to the normal retention rate calculation however it is based on a match process using both the StudentID and the Commonwealth Higher Education Student Support Number (CHESSN). This gives a more accurate retention rate calculation, as it identifies students at either the same or a different higher education institution. In other words, if a student moves from one institution to another in the following year, he or she would be counted as retained in the adjusted retention rate calculation, but attributed in the normal retention rate calculation.

(b) Data for the Australian Defence Force Academy are included under The University of New South Wales.

(c) Previously University of Ballarat.

(d) Torrens University Australia became a Table B university in 2015.

(e) From 2007 onwards, data for the Australian Maritime College are reported as part of the University of Tasmania.

(f) As a result of a collaborative partnership between Batchelor Institute of Indigenous Tertiary Education and Charles Darwin University which established The Australian Centre for Indigenous Knowledge and Education (ACIKE), the delivery of most undergraduate programs is at Charles Darwin University from 2012.

Cell values of '.' indicate no domestic commencing bachelor students.

(a) The New Normal Retention rate for year(x) is the number of students who commenced a bachelor course in year(x) and did not complete in year(x) or year(x+1), and continued in year(x+1) (retained students), as a proportion of all students who commenced a bachelor course in year(x) and did not complete in year(x) or year(x+1). The new normal retention rate calculation is based on a match process using the students' StudentID. This gives a "crude" retention rate, which identifies students that are retained the following year at the same institution. Students who remained at the same institution, but changed course are counted as retained and students who changed institutions are not counted as retained.

(b) Data for the Australian Defence Force Academy are included under The University of New South Wales.

(c) Previously University of Ballarat.

(d) Torrens University Australia became a Table B university in 2015.

(e) From 2007 onwards, data for the Australian Maritime College are reported as part of the University of Tasmania.

(f) As a result of a collaborative partnership between Batchelor Institute of Indigenous Tertiary Education and Charles Darwin University which established The Australian Centre for Indigenous Knowledge and Education (ACIKE), the delivery of most undergraduate programs is at Charles Darwin University from 2012.

Cell values of "." indicate no overseas commencing bachelor students.

(a) The New Adjusted Attrition rate for year(x) is the proportion of students who commenced a course in year(x) who neither complete in year(x) or year(x + 1) nor return in year(x + 1). The new adjusted attrition rate calculation is similar to the normal attrition rate calculation, however it is based on a match process using both the StudentID and the Commonwealth Higher Education Student Support Number (CHESN). This gives a more accurate attrition rate calculation, as it identifies students at either the same or a different higher education institution. In other words, if a student moves from one institution to another in the following year, he or she would be counted as retained in the new adjusted attrition rate calculation, but attrited in the normal attrition rate calculation. For the new adjusted attrition rate, it is only those students who left the higher education system entirely (that is, they were no longer at any institution) that are counted as attrited.

(b) Less than 25 domestic commencing bachelor students.

(c) No longer active as an approved higher education institution.

(d) Torrens University Australia became a Table B university in 2015.

Cell values of '.' indicate no domestic commencing bachelor students.

(a) The New Normal Attrition rate for year(x) is the proportion of students who commenced a course in year(x) who neither complete in year(x) or year(x + 1) nor return in year(x + 1). The new normal attrition rate calculation is based on a match process using the students' StudentID. This gives a 'true' attrition rate, which identifies students that neither complete a course nor are retained the following year at the same institution. Students who remained at the same institution, but changed course are not counted in the attrition group. Students who changed institution are counted as attrited.

(b) Less than 25 overseas commencing bachelor students.

(c) No longer active as an approved higher education institution.

(d) Torrens University Australia became a Table B university in 2015.

Cell values of '-' indicate no overseas commencing bachelor students.

(a) The New Normal Attrition rate for year(x) is the proportion of students who commenced a course in year(x) who neither complete in year(x) or year(x + 1) nor return in year(x + 1). The new normal attrition rate calculation is based on a match process using the students' StudentID. This gives a "crude" attrition rate, which identifies students that neither complete a course nor are retained the following year at the same institution. Students who remained at the same institution, but changed course are not counted in the attrition group. Students who changed institution are counted as attrited.

(b) Less than 25 commencing bachelor students.

(c) No longer active as an approved higher education institution.

(d) Torrens University Australia became a Table B university in 2015.

Cell values of '.' indicate no commencing bachelor students.

(a) The New Adjusted Retention rate for year(x) is the number of students who commenced a bachelor course in year(x) and did not complete in year(x) or year(x + 1) and continued in year(x+1) (retained students), as a proportion of all students who commenced a bachelor course in year(x) and did not complete in year(x) or year(x+1). The new adjusted retention rate calculation is similar to the normal retention rate calculation however it is based on a match process using both the StudentID and the Commonwealth Higher Education Student Support Number (CHESSEN). This gives a more accurate retention rate calculation, as it identifies students at either the same or a different higher education institution. In other words, if a student moves from one institution to another in the following year, he or she would be counted as retained in the adjusted retention rate calculation, but attrited in the normal retention rate calculation.

(b) Less than 25 domestic commencing bachelor students.

(c) No longer active as an approved higher education institution.

(d) Torrens University Australia became a Table B university in 2015.

Cell values of '.' indicate no domestic commencing bachelor students.

(a) The New Normal Retention rate for year(x) is the number of students who commenced a bachelor course in year(x) and did not complete in year(x) or year(x+1), and continued in year(x+1) (retained students), as a proportion of all students who commenced a bachelor course in year(x) and did not complete in year(x) or year(x+1). The new normal retention rate calculation is based on a match process using the students' StudentID. This gives a "crossed" retention rate, which identifies students that are retained the following year at the same institution. Students who remained at the same institution, but changed course are counted as retained and students who changed institutions are not counted as retained.

(b) Less than 25 overseas commencing bachelor students.

(c) No longer active as an approved higher education institution.

(d) Torrens University Australia became a Table B university in 2015.

Cell values of "-" indicate no overseas commencing bachelor students.

(a) The New Normal Retention rate for year(x) is the number of students who commenced a bachelor course in year(x) and did not complete in year(x) or year(x + 1), and continued in year(x+1) (retained students), as a proportion of all students who commenced a bachelor course in year(x) and did not complete in year(x) or year(x+1). The new normal retention rate calculation is based on a match process using the students' StudentID. This gives a "crude" retention rate, which identifies students that are retained the following year at the same institution. Students who remained at the same institution, but changed course are counted as retained and students who changed institutions are not counted as retained.

(b) Less than 25 commencing bachelor students.

(c) No longer active as an approved higher education institution.

(d) Torrens University Australia became a Table B university in 2015.

Cell values of '.' indicate no commencing bachelor students.
