

Template: Information sources for your evaluation

This template allows you to identify what sources will be used to collect evidence on your measures.

How to use this template:

- Use your evaluation framework to enter your measures in the columns, adding more columns where necessary
- Use the guidance material to help choose one or more sources of information per measure
- Use a tick to indicate what sources each measure will draw on, and a short description of the source (e.g. for surveys: a survey of Year 9 and 10 students who participated in the initiative)

Key evaluation question

Did the initiative achieve [insert its intended outcome(s)]?

Sources - Evidence to gather	Design	Implementation	Outputs	Engagement outcome	Achievement outcome	Behaviours as proxies outcome	Beliefs as proxies outcome
Measure	See help text below	See help text below	See help text below	See help text below	See help text below	See help text below	See help text below
