

National Regional, Rural and Remote Education Strategy

Submission form

Welcome to the submission process for the National Regional, Rural and Remote Education Strategy (the Strategy).

The Regional Education Expert Advisory Group invites all interested parties to put forward ideas on the <u>framing paper</u> released on 20 December 2018.

The Advisory Group is seeking action-orientated responses to the challenges and key questions identified in this paper. The paper outlines the background of the strategy formation, the problem facing regional, rural and remote education and the challenges faced by those communities.

Your responses to the Framing Paper should focus on practical steps the Government could take to improve tertiary education access and attainment for people from regional, rural and remote backgrounds.

The form can be submitted any time before public submissions close at 5:00pm (AEDT) on 1 February 2019.

Please note that the fields in the form are text only and pictures cannot be included. To return your completed form or if you experience difficulties in completing the form, please contact the Strategy Secretariat at RegionalStrategy@education.gov.au.

Note:

- information provided through the submission process may be published with your permission, including in the documentation relating to the Strategy and on the department's website
- questions marked with a * require an answer to be provided.

Key Questions from the Framing Paper

The Regional Education Expert Advisory Group is seeking responses to the following key questions. Specifically, we are looking for practical steps to overcome the five challenges facing students from RRR backgrounds.

Challenge A: There are fewer study options available in RRR areas

- 1. What opportunities exist to expand options for further study in RRR areas?
- 2. What potential is there for universities, vocational training providers and other service providers to better work together in RRR areas, including opportunities to expand service offerings and better support articulation between VET and higher education?

Challenge B: Relocating RRR students face significant financial, emotional and social challenges

- 3. What financial supports work best for students from RRR backgrounds, including those who choose to relocate?
- 4. What forms of support might be useful in helping students from RRR backgrounds to continue with their tertiary study?
- 5. How can universities assist RRR students to feel like they belong on their campus?

Challenge C: Raising aspirations for tertiary education

6. What actions would help to raise aspirations and support informed career choices for students from RRR backgrounds?

Challenge D: RRR often experience multiple forms of disadvantage

- 7. What practical steps can be taken to support RRR students who experience multiple forms of disadvantage?
- 8. How can we better support Indigenous people from RRR areas to access and succeed in tertiary education?

Challenge E: Attracting people and jobs to RRR areas

- 9. How can tertiary education providers further stimulate economic growth in RRR areas?
- 10. What actions would further strengthen and increase the attractiveness of regional universities?
- 11. What policies would attract more metropolitan and international students to study at RRR areas, including regional universities and campuses?

Challenge F: Implementing and monitoring a national strategy

- 12. Would there be value in establishing a National Regional Education Commissioner to oversee the Strategy and, if so, what should their role be?
- 13. How should success be measured? What goals and targets, including for tertiary education attainment, should be considered both at a national and individual community level?

Please use the space provided below to respond to the questions above

The table cell will expand to accommodate your response. Please limit your response to 3000 words.

The Smith Family provides this submission with a focus on young people in regional and rural communities. The REAG Framing Paper identifies raising the aspirations of these young people for tertiary education, and supporting informed career choices, as major challenges, and highlighted several barriers including:¹

- misconceptions about the prospects of getting into university or successfully completing a university degree;
- a lack of exposure to role models from different tertiary backgrounds;
- a lack of exposure to universities in general;
- a focus in regional communities on short-term employment as opposed to considering different career pathways on offer in universities and vocational education and training (VET);
- a lack of information on study and career options in the tertiary system generally.

The Smith Family agrees that young people in regional communities require better assistance to understand the full range of tertiary pathways available to them. This includes addressing misconceptions that a vocational qualification is less valuable compared to university and that VET largely focuses on traditional trades. Current data suggests VET graduates have higher employment rates than undergraduates, and earn wages comparable to, if not exceeding, their university educated peers.²

There are numerous examples of successful programs, delivered by charities and not-for-profits in the community sector that support the career aspirations of young people in regional and rural communities and assist them to develop and action plans that realise these aspirations. We would like to draw to the Advisory Group's attention programs that The Smith Family is delivering in regional communities, or can be appropriately scaled to do so, as examples of the type of initiatives that can support improved educational outcomes for young people from these areas.

We have also offered brief comment on how to best measure success at improving tertiary education attainment. Our comments are set out below.

1. iTrack

Our *iTrack* online mentoring program is one example of a practical initiative that actively seeks to combat each of the above barriers. The *iTrack* program is delivered to around 1,000 Year 9 to 11 students per year, including many from regional communities. This program matches students with a supportive adult, who provides practical advice and guidance about workplace, study and career opportunities. The mentoring relationship is developed online through weekly chat sessions for approximately an hour a week, for 18 weeks. The program helps students extend the networks of advice that they can draw on, at a key point in their lives. The conversations between the mentor and student encourage the student to do their own research into post-school—pathways and to begin formulating a

plan for pursuing specific post-school opportunities. This also encourages better ownership of the discussions by the student as they identify the steps needed to implement their post-school plan.

The Smith Family draws volunteer mentors from our corporate and community partners. Mentors are matched with students to ensure the conversations can be as valuable as possible. Mentors are also trained and supervised to ensure their support of students is high quality.

Because the program is online, students from regional areas can access a large and diverse pool of support from a range of locations, including metropolitan areas. This helps overcome the geographical distance and disconnect that so many young people experience in regional and rural communities.

For young people in regional communities, connecting with mentors with tertiary education and employment experience, and from different locations, helps them better understand the suite of opportunities available in universities and VET, and to more fully consider which options suit them best.

Annual evaluations of the program show that the program has a lasting impact on the young people who participate. Our latest assessment results, from 2017, show that:

- 89 per cent of students explored post school options once they finished the program;
- 85 per cent thought their mentor helped them feel more positive about their future job, career and study options;
- 83 per cent agreed that talking to their mentor has given them more ideas about possible plans for when they finish school; and
- 82 per cent agreed their mentor helped them understand more about how they can reach their career goals.

Students often refer their friends and peers to the program once they have completed it, another indication of the program's effectiveness.

Programs such as *iTrack* are cost-effective and adaptable to many regions, and work best when they are integrated into local school curricula, and when the families and carers of young people understand the relevancy and benefits of the program. The service infrastructure can be rolled out efficiently to support more students in regional areas if additional support and investment were available. This is just one example of how regional students can receive better quality career education and advice.

2. Career Mentoring Program (CMP)

The Smith Family offers the CMP for tertiary students entering their final year of higher education and receiving one of our tertiary scholarships. Students are matched with a mentor in their chosen career field who has first-hand experience of breaking into the industry and knowledge of how to navigate career pathways. Mentors are able to provide support, advice and potential networking opportunities over a twelve-month period.

CMP provides students with skills and knowledge to prepare for life after study. Students develop a career plan and a clear sense of actions required to achieve their goals, expand their professional networks, improve their industry insights, develop industry specific job searching skills, and develop their soft skills (including interpersonal skills and an understanding of workplace cultures, practices and behaviours).

The program is flexible and tailored to the individual student's needs. It can also connect students and mentors from different locations including regional communities, similar to *iTrack*. Students and mentors decide how often to meet, how to communicate (e.g. face-to-face, email, online chat and the like) and which particular items to discuss regarding career planning. They are required to meet for a minimum of twice a semester in person or online; and communicate at least one a month.

Delivering targeted careers education at this stage of the education journey offers one more effective intervention to assist disadvantaged young students to make suitable choices for their lives. This type

of program will achieve an effective result when it is paired with other, earlier interventions during primary and secondary school.

3. Primary Careers Program

The Smith Family is currently implementing a pilot program targeting students in Years 4 to 6 which is informed by the latest research showing children begin to form stereotypes about occupations, careers and participation in post-school education from an early age for a range of reasons, including the unconscious influences of parents, friends and others they engage with.³ Once these limits are set, individuals will rarely consider broader alternatives.

The purpose of the program is to support students to increase their understanding of the 'world of work' by introducing them to a wide variety of jobs and the skill sets needed now and in the future. It aims to broaden students' aspirations about their future and encourages them to remain engaged at school and prepares them for future careers.

The program:

- supports students to better understand their own interests and skills and helps them develop communication, critical thinking, collaboration and creativity skills;
- engages students with a range of people from the world of work, from a variety of industry
 and professions. This helps widen the students' views of the world of work and better
 understand the transferability of skills across industries and professions;
- helps students create and explore a 'job of the future'. This contributes to enhancing their motivation around the world of work; and
- facilitates students' interaction with peers, teachers, parents and community members around the world of work.

A key resource developed for the program is high quality digital content for students to engage with. This in turn increases the scalability of the program, including the ability to roll the program out in regional areas in an efficacious way.

Measuring success of the RRR Strategy

The Smith Family agrees with the Advisory Group that for a National Regional, Rural and Remote Education Strategy to be successful, suitable indicators of success must be identified and measured consistently over time. Ideally, measures of success will be developed that can both capture information on how individual local communities are trending, as well as highlight state and national trends.

We suggest the following measures be adopted at a minimum:

- 1. Year 12 completion rates;
- 2. Completion rates of VET; and
- 3. Completion rates of higher education.

Data collected on these measures should also capture key demographic information such as Indigeneity, age, gender, socio-economic status, location, and disability.

The Advisory Group should consider ways it could also collect and analyse information relating to the regional students' experience of the tertiary education system. Valuable information would include what supported people's course completion, as well as challenges and barriers they have faced in undertaking their study. Given the challenge in accumulating such data, the Advisory Group could consider efficient methods of collecting representative samples from this cohort, such as through annual surveys with select students from regional communities done in collaboration with the Department of Education and Training and local organisations.

³ NSW Education and Communities (2014), *The case for career-related learning in primary schools: An introduction to primary school principals.*

We would be happy to discuss our submission further with the Advisory Group at its convenience.		

Please provide a short summary of the key points in your submission

Please limit your response to 300 words— **note:** any text above 300 words will be excluded from your submission. The table cell will expand to accommodate your response.

The Smith Family agrees with the Advisory Group that raising aspirations and supporting informed career choices is crucial if the educational outcomes for students from regional, rural and remote communities is to be improved. The Smith Family has identified three programs helping students consider their post-school pathways into further training, study or work, that can be effectively delivered to regional and rural communities. These programs can enhance careers support in such communities. They are just an example of the myriad of programs delivered across the country by the community and charity sector.

These programs are:

- 1. *iTrack* an online mentoring program for students in Years 9 to 11;
- 2. *Career Mentoring Program* sophisticated, year-long mentoring provided to tertiary students in their final year of study; and
- 3. *Primary Careers* a program delivering tailored careers information to students in Years 4 to 6, using the latest research about early intervention.

Finally, in measuring the success of any RRR Education Strategy, the Advisory Group should consider measures to evaluate local, state national trends consistently over time. Recommended measures include (1) Year 12 completion rates; (2) Completion rates of VET; and (3) Completion rates of higher education, and regular capturing of important information regarding regional students' experience of the tertiary education system.

Privacy Notice and Terms and Conditions for Submissions

Purpose for collection of information relating to submissions, and the use and disclosure of that information

The Australian Government Department of Education and Training (the department) invites you to make a submission in relation to the development of the National Regional, Rural and Remote Education Strategy (the Strategy).

Through the submission process, the department will be collecting certain information, including personal information. The information collected may include your name, your email address, the organisation you represent (if applicable) and any other information that is included in your submission.

The department may use and disclose this information for the purposes of informing or contributing to the Strategy, policy development related to the subject of the Strategy, publishing submissions (including by making submissions publicly available), and providing feedback to the department's Minister about the Strategy and submission process.

The department may also contact you to provide updates on the progress of the Strategy, if you have indicated in your submission response that you would like to receive such updates.

Publishing submissions

The department reserves the right to publish any submissions, including only a sample of submissions, made in relation to the Strategy. This includes by making those submissions publicly available on the department's website, or through any report/s arising from the Strategy.

You may elect **not** to have your submission published. If you do not want to have your submission published, **do not check** the relevant box on this document.

Before publication, your email address, if provided with your submission, will be removed. **However, your name will be published with your submission.**

Note, any information about individuals contained in your submission will be published. Note also that the name and address of any organisation you represent, if included in your submission, will also be published.

The department reserves the right to amend or redact prior to publication, or to not publish, any submission if it considers the submission to be defamatory or derogatory in any way, or if it includes information relating to individuals.

The department also reserves the right to modify or adapt submissions for the purposes of web accessibility and any publishing formatting requirements.

For more information, please also visit the department's Copyright page.

Third party information, including of individuals, in submissions

If you are making a submission on behalf of an organisation, or represent that you are, you must ensure that you have that organisation's agreement prior to making the submission. By making a submission, you represent to the department that you have such agreement.

If there is information in your submission referencing an individual, which is not otherwise publicly available, you must ensure that you have the consent of the individual to whom the information relates to include it in the submission. By making a submission, you represent to the department that you have such consent.

By making a submission, you further represent to the department that your submission does not contain any confidential information about any individual or organisation.

Privacy policy and contact

For further information about the department's privacy policy and how it deals with information, including how you can access or correct your personal information, please see the department's <u>privacy</u> policy.

For any queries relating to this Privacy Notice and Terms and Conditions for Submissions, the Strategy or your submission please contact the Regional Education Strategy Taskforce via email on: RegionalStrategy@education.gov.au
